That Terrible Bisaster. London, September 4.- The steamer Princess Alice, which was run into and sank with such frightful re-sults last evening by the colice Bywell Castle, was one of the largest sulcon sceamers of the London Steambout Company. The Princess Alice left Gravesend for London soon after 6 in the evening, and arrived within sight of the Royal arsenal at Wolf Point at bout 8. It is believed that not more than 150 persons escaped out of 800 on board. The vessel Princess Alice was a long and low river steamer, built for excursions down the Thames, of which the middle and poorer classes of Lendoners were very fond. Her passenger carrying capacity was unsually large. A large proportion of her passengers last evening were on the upper er saloon deck, and must have seen beforehand their impending doom but those in the stern of the steamer had no warning until they heard the crash, and found the passengers from the forward part of the vessel running to the after part.
